

## Luminos 3 Plus

State of the art flying insect control technology.

**Luminos 3 Plus delivers enhanced flying insect control for businesses that require a higher level of protection than standard glue board units, including food retailers, property management companies and offices.**

Luminos 3 Plus uses unique encapsulation technology developed by Rentokil. This approach to fly control works by trapping insects on an adhesive film at the bottom of the unit, which automatically winds at regular intervals, to help mitigate the risks of contamination from dead insects. The unit offers the option to add a rear glue board aligned with the encapsulation to further increase catch rate in higher risk areas.

### Our complete Fly Service Program

The wall mounted unit uses three 15W UV-A bulbs to attract insects, has an attractive design enabling usage in public areas and, if needed, is available in a white, silver and chrome cover. Luminos 3 Plus requires professional servicing; dependent on infestation levels, the adhesive film should be replaced every 3 months at a minimum and the bulbs at least once a year.

### Luminos 3 Plus: Benefits to your business

- Available with a maintenance solution
- Encapsulation technology reduces risk of contamination from trapped insects
- Better catch rate than any competitive model
- Automatic wind on adhesive film
- Quick servicing, minimal disruption to your business
- Can maintain long intervals between servicing with no visible flies
- Attractive design
- Safe and hygienic – fulfills all legal, health and safety requirements

Luminos 3 Plus

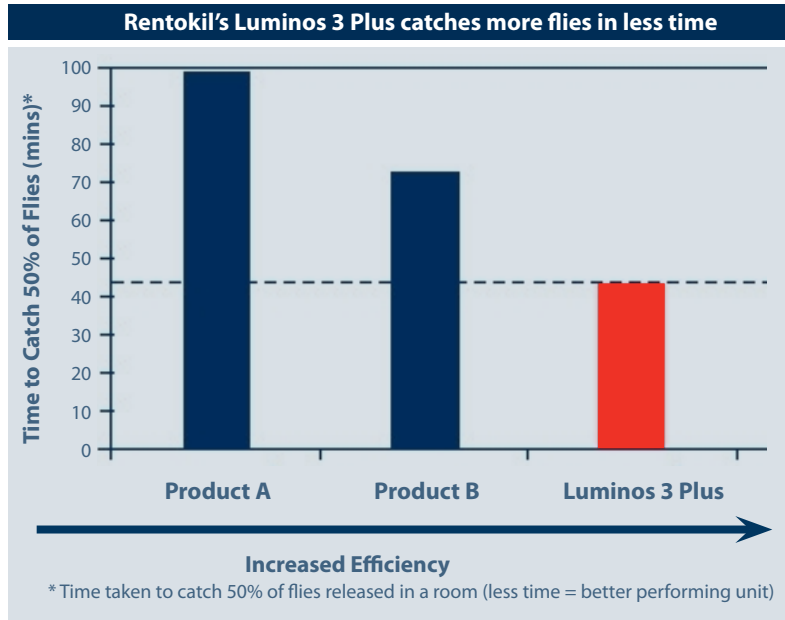

Suitable for a range of customers, including:

- Convenience food retailers
- Commercial building
- Large food retailers
- Hotels
- Health care facilities
- Schools
- Restaurants

# Luminos 3 Plus

Exclusive technology and advanced features make Luminos 3 Plus cleaner, safer and easier to use.

## Unique technology, greater protection

The graph (left) reflects the calculated Half Life Time for Rentokil's Luminos 3 Plus. This test measures how quickly a unit catches 50% of flies in an area, and uses this as a measure of overall effectiveness.

When equipped with a high contrast cover, the Luminos 3 Plus trapped flies quicker than any comparable product on the market.

## Technical specification

The Luminos 3 Plus offers highly effective fly control and an aesthetically pleasing design that conforms to all US electrical and  safety standards.

The unit has been designed so that some simple servicing, such as changing the tubes, can be done by removing the front cover. Servicing is at ground level, which results in minimal disruption to your business.

To ensure optimum performance, the unit should be professionally serviced by your Rentokil Technician. The bulbs should be replaced annually or, if fly pressure is high, twice a year.

Luminos 3 Plus	
Dimensions (H,W,D)	20" x 15" x 6"
Weight	10 lbs (Unboxed)
Lamp	3X15W 18 inch Philips Type TL
